

Geospatial solutions for Heritage

Helping in discovery, maintenance, and promotion of historical monuments and landscapes, by integrating sophisticated photography, image processing, and software applications.

Visualizing the past for the future.

Our solutions enable digital documentation for record keeping, conservation, restoration, renovation and development of virtual reality based applications.

Why IIC Technologies

Specialized skillset

Our offerings are a blend of crafted expertise and multiple years of experience in Heritage and reconstruction. Our team of experts has a track record of over three decades working on prestigious historic sites.

Data integration

Expertise in integrating large data sets, helps in improving information sharing within the organization and between different agencies, helping them plan and execute projects efficiently.

Adaptability

Having delivered projects around the globe in accordance with international quality standards for a varied set of clients, has made us adept at handling complex projects and delivering sophisticated solutions.

Made to order

Our experienced team has wide ranging expertise in broad range of technologies in capture and presentation of 3D data. This helps us deliver effective, accurate and innovative solutions.

KEY SOLUTIONS

Measured building surveys

- Detailed plans and models of intricate architectural detail
- Individual buildings and large heritage structures

Historical landscape surveys

- Specialized historical landscape design
- Immersive 3D models using high end precision cameras through Aerial photography (both manned & unmanned)

3D Modeling

- Realistic 3D models from stereo photographs and laser scans
- Effective and accurate 3D solutions.

Visualization and Animation

- Digital documentation of monuments and sites in 3D form using state of art visualization techniques.
- Fusing 3D survey data, real world conditions and historical interpretations
