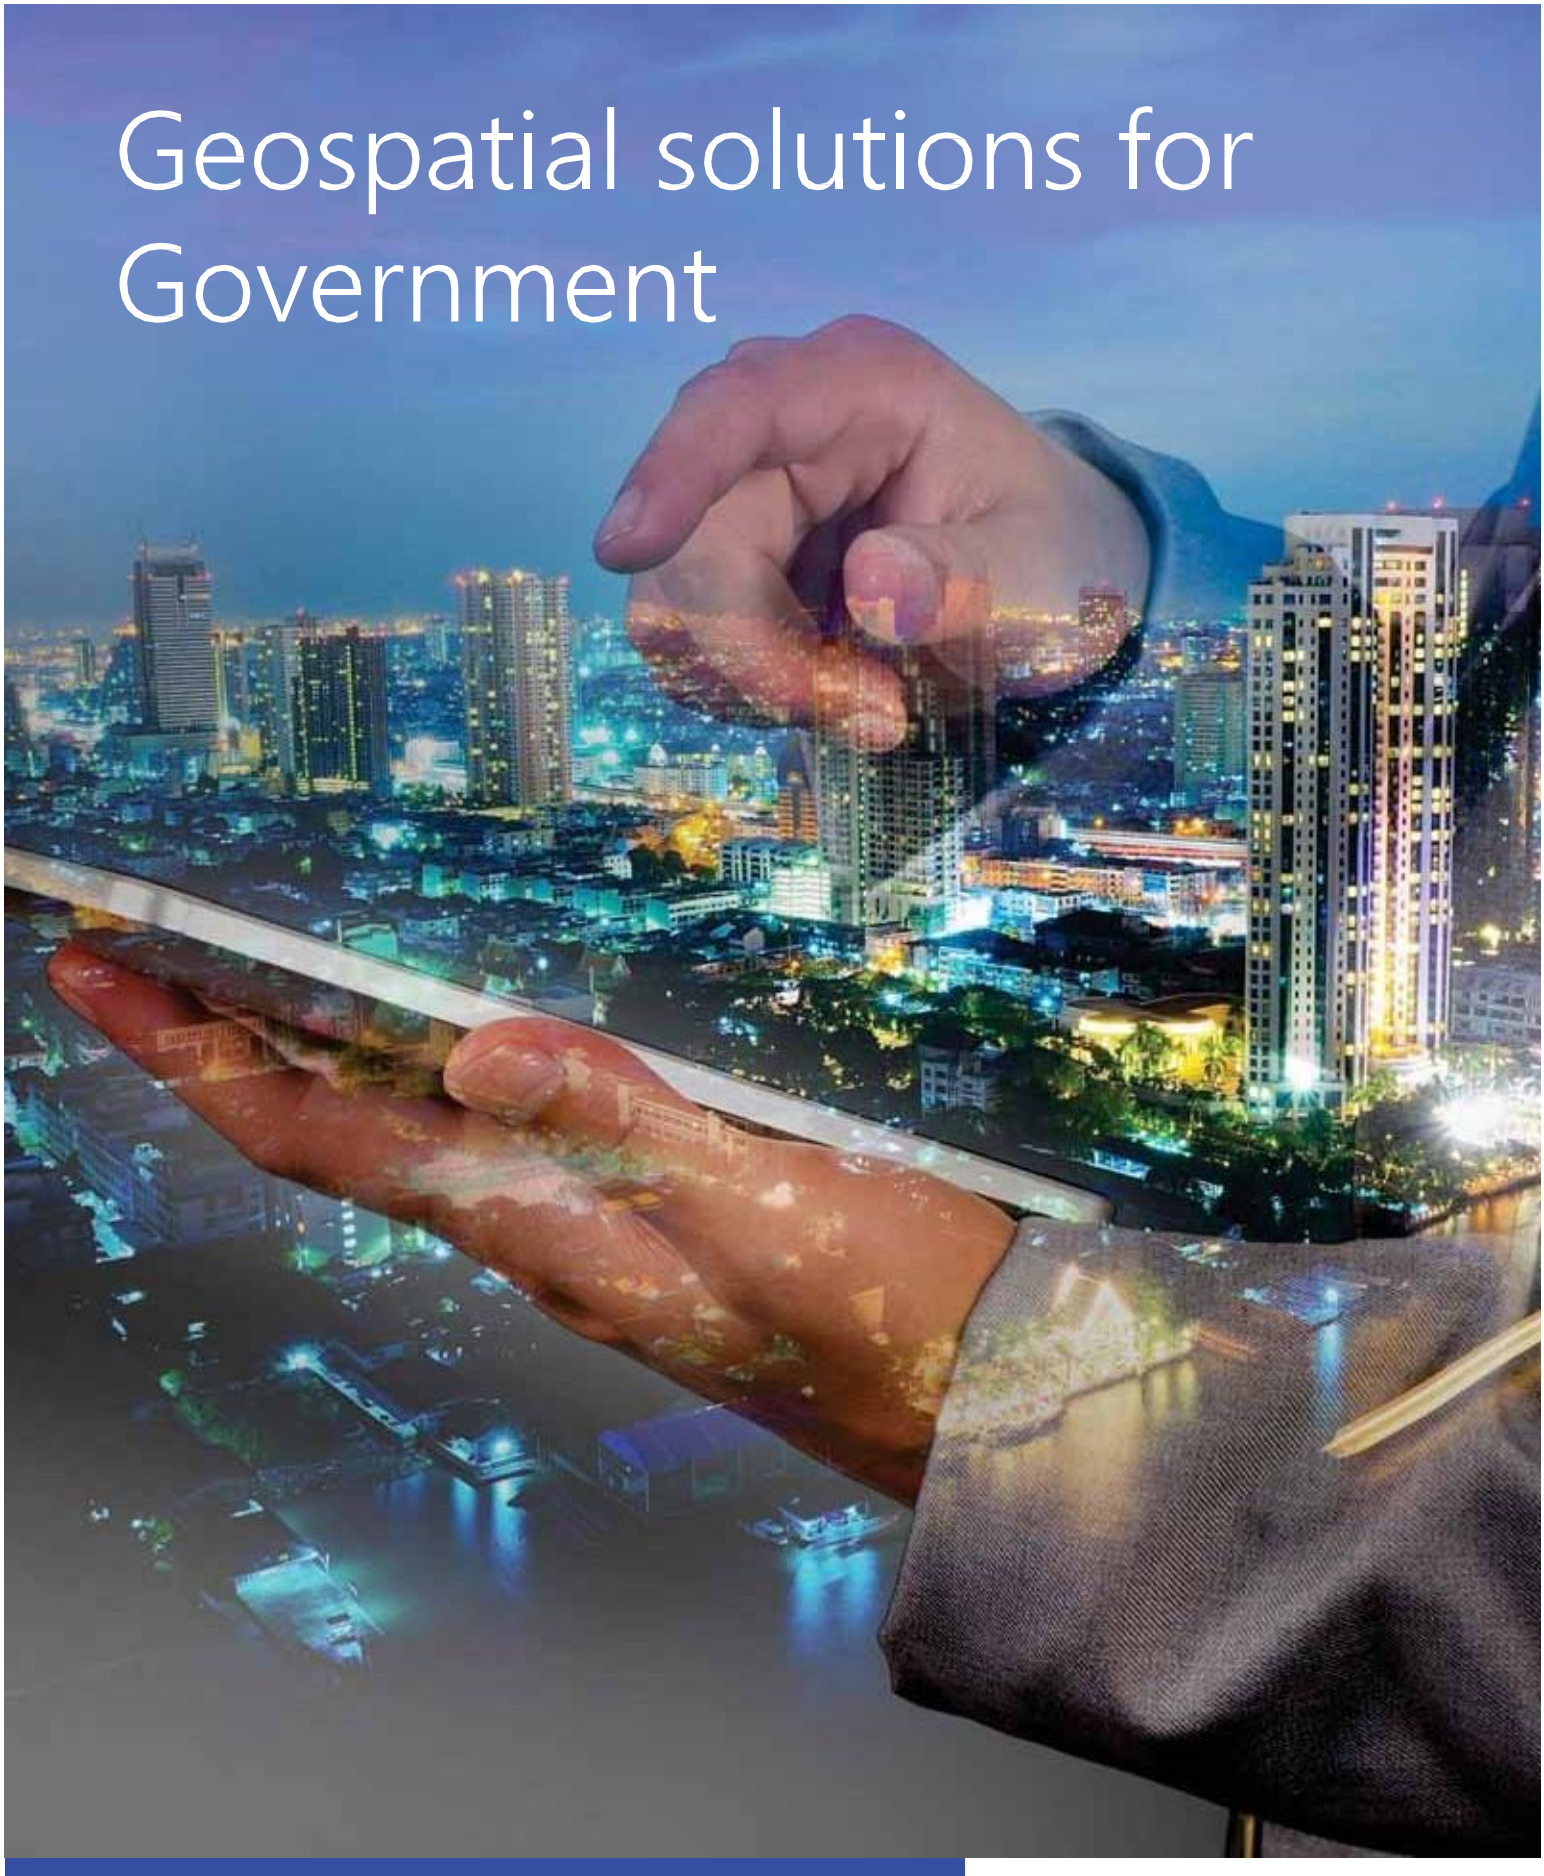
Geospatial solutions for Government



Helping administrators visualize, integrate and interpret data into actionable insights for better and smarter governance.

IIC TECHNOLOGIES

Enabling smart decision making for **smart governance.**

Our solutions have helped governments across the world to address issues with land management, disaster management and smart city planning.

Why IIC Technologies

Bridging the gap, realizing the ideas

Expertise in developing detailed proof of concepts, helps bridge gap between envisioning an idea and delivery of the solution.

Data integration

Expertise in integrating large data sets, helps in improving information sharing within the organization and between different agencies, helping them plan and execute projects efficiently.

Adaptability

Having delivered projects around the globe in accordance with international quality standards for a varied set of clients, has made us adept at handling complex projects and delivering sophisticated solutions.

Made to order

Our software team has experience in developing end user applications for clients spread around the globe. Our expertise in working with multiple platforms, including open source systems has helped deliver high quality applications.
