

Geospatial solutions for Infrastructure

Offering key solutions in the planning and execution of the infrastructure projects, as well as the operations, maintenance, and renewal of sustainable infrastructure.

End to end solutions in planning, construction, maintenance, and renewal of **infrastructure**.

Our solutions range from feasibility surveys to detailed project reports to development and maintenance of data management solutions.

Why IIC Technologies

Bridging the gap, realizing the ideas

Expertise in developing detailed proof of concepts, helps bridge gap between envisioning an idea and delivery of the solution.

Data integration

Expertise in integrating large data sets, helps in improving information sharing within the organization and between different agencies, helping them plan and execute projects efficiently.

Adaptability

Having delivered projects around the globe in accordance with international quality standards for a varied set of clients, has made us adept at handling complex projects and delivering sophisticated solutions.

Made to order

Our software team has experience in developing end user applications for clients spread around the globe. Our expertise in working with multiple platforms, including open source systems has helped deliver high quality applications.
